

3D DIGITAL MAMMOGRAPHY:

**A better image
for your doctor...
peace of mind
for *you*.**

Welcome to Digital Breast Tomosynthesis at Breast Care Center, Navicent Health.

One of the latest innovations in breast care is digital breast tomosynthesis, also called 3D mammography. Breast Care Center, Navicent Health is proud to announce we have GE Healthcare's solution: SenoClaire™

SenoClaire produces images in an advanced way, so your doctors can detect breast cancer, and detect it early. Your doctor gets a clear 3D image, and you get a 3D mammogram with a low dose similar to traditional mammography. Everything we do is all about *you!*

**Breast Tomosynthesis
3D Digital Mammography
has been shown to be
more effective at
detecting breast cancer than
traditional mammography**
